

#### AMENDMENTS TO THE SPECIFICATION

In the paragraph that begins at line 15 on page 14 of the of the PCT publication, kindly amend the specification as follows:

As an example, “alkylalkenylcarbonate” refers to a alkyl-OC(O)O-alkenyl group, thus a carbonate substituted at one side with an alkyl and on the other side with an alkenyl, one of the alkyl and alkenyl groups being further coupled to another molecule or atom, thereby forming, in the case of the alkyl group, a divalent alkylenyl moiety, or in the case of the alkenyl group, a divalent alkenylene moiety. Similarly, “dialkylcarbonato” refers to an alkyl-OC(O)O-alkylenyl moiety in which the alkylenyl group is further coupled to another molecule or atom.
